	Cows generally behaved well. They were yarded with other cows and calves overnight. They were weighed on a platform in the draft box and as such had plenty of room to move. The the few cows that did tail flick and stamp settled reasonably well once the pressure was relaxed and they were back in their mob.					
Handled With	Bikes , Vehicles					
Assessor Comments	A very good line of Hereford/ Poll Hereford PTIC Cows. The cows are predominantly aged breeders, however their is one first calving heifer in the group. The cows are in forward condition and are carrying themselves well. On inspection all toes and feet were in very good order. PTIC from 30 - 38 weeks to a Hard Hat Angus Bull.
