|                    | Very good to handle in their own familiar environment and yards. Ran to the mob when out in the laneway.                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                           |                |

| Assessor Comments  | A nice line of EU Speckle Park /Angus X steer yearlings. 70 head in a tight range of 284-350 kg . A line of steer calves showing potential and quality expected from an outstanding herd. Note that a further tail has been removed. Considered these easy to handle with loads of potential. 2 head in the mob are showing an old eye scar but not considered detrimental. 3 showing old ringworm scars. All are showing a rubbed winter coat but after both drench , vaccine and multimin they look primed to perform quickly on good feed and warmer weather. |                                           |                |
