Vendor Comments	Young Nannies that will grow into quality mothers. Have just weaned 160% after last mustering in April.
Joining Details	Station Mated - Continuously Joined Ram Breed(s): Kalahari, Boer, Rangeland at 5.0% Rams
Preg Scanned?	No, this lot was not pregnancy scanned.
Other Joining Details	Boer and Kalahari Bucks have been used for joining but vendor noted many Rangeland Bucks were still in flock.
Assessor Comments	On offer is a quality lineup of young future breeding nannies that have been bred in South West Qld from a very fertile flock which were very good to handle in the yards. Nannies present in fresh store condition and will continue to power on given the chance. As goats have a very quick reproductive rate there is a good chance that these nannies will be in kid to Kalahari, Boer or Rangelands bucks, although no guarantees are given. A percentage of nannies show some 1st cross characteristics but photos and video should be viewed to make own determination of breed content. Four nannies were noted at assessment showing an udder, which is believed to be from a weaner already being taken off. These nannies will produce many kids in their lifetime and make a fantastic return on investment. Nannies will be tagged at time of delivery.
