Assessor Comments	JD Schultz have been breeding Composite replacement ewes from Cashmore Oaklea Sires over the last 10 years. The initial selection critereia is based on fertility, where sires have been selected in the top 5% of that trait. Growth is the next target area, ensuring that lambs are able to be marketed as soon as practicable, season permitting. This line of ewe lambs are the tops of the draft & the largest percentage would be single reared lambs. They exhibit all the traits composite breeders are looking to source. True to type appearance, growth, shape & cover. At assessment the entire line was weighed with a range of 32-43kg. These ewes will continue to grow & mature and will, on the right plain of nutrition, be ready to join in January for a July / Aug 2022 lambing. The ewes offer an opportunity for the buyer to secure properly bred replacements. Approx 6 long tailed lambs have been marked. There is another line of 190 ewe lambs in this sale, to total 300 all up, or truck & trailer load.
