| Skin Comment           | Skins have some dust penetration and are dry in the tip. There is also some pulling at the tip from lambs running on saltbush and hopbush. Were inspected for licence and none could be found. |
| Wool Comment           | Typical first cross fleece, some dust penetration at tip, ideally lambs need shearing.                                                                                                         |

| Assessor               | A good line of first cross wether lambs sired by Dunniel Border rams. Lambs have been well weaned and are ideally ready to be shorn and go ahead after coming through a tough season. Avg 24 kg. Please note a few wethers with weepy eye from lentil hay. Lambs have some pulling at wool tip from grazing in salt bush and hop bush. No lice could be seen at assessment. Lambs were all weighed through auto draft from 15.1kg to 29.9kg. 10% tail removed Another line of Wether lambs and 2 lines of ewe lambs in same sale. |                                 |               |      |
