Preg Tested?	Yes, this lot was pregnancy tested, by Chris Hallett (Vet) on 26/07/2021. 20 Head (100%) PTIC, from 4.5 to 6.5 months (at time of assessment). Certificate Available.
Other Joining Details	The above joining details were taken from Auctionsplus assessment done when purchased. Please see assessors comments as well
Temperament	Yards Crush Paddock Quiet: 19 head Quiet: 20 head Temperament not assessed in Slightly Stirry: 1 head Paddock

These cattle have been very well handled and were quiet in the yards and through the crush. One heifer was a bit pushy in the yards but was not an issue at all, she just wanted to be first out the gate and blocked up and went up the race and weighed quietly.

Assessor Comments A very even line of good quality PTIC Angus heifers that were originally purchased out of Victoria and joined to Tivoli Angus bulls to calve over eight weeks. There are 2 heifers with a little bit of white on the udder. These heifers are only on the market as a slight change in direction and not deciding not to have Autumn calving females. Preg testing was done before vendor purchased heifers and PTIC in terms of months in calf at assessment results match the joining dates. When assessing the heifers I observed some heifers that have little udders forming and are obviously in calf and look to me to that they could possibly calve before end of January. This is a visual observation only and have no reason to believe the given joining details are incorrect.
