| Assessor Comments   | <p>A line of Angus heifers providing well for their young calves. Heifers have been purchased and calved down specifically as part of the 'Timor Cattle' heifer operation. Heifers present in a store condition and have the ability, if given the chance to grow out into nice cows for the future. Calves are 2-5weeks of age and average 61kg. Heifers calved with ease and unassisted as they were joined to LBW Angus sires. With all the hard work of calving down future breeders already done, this line of heifers and calves offer a excellent opportunity for the incoming purchaser to put together a good run of heifers. Heifers have been grazing in the hills and for first calf heifers in store condition they are doing a great job on their calves and milking well. Please not (9) heifers noted with white under the belly, (3) heifer with a blue eye. Please note delivery will be over 2x25 lots unless purchased by the one buyer.</p> |                                                   |                                            |
