Assessor Comments

An outstanding line of Team Te Mania Angus cows due to commence calving mid-February. They are well handled, ACR recorded, EU accredited and in very good order weighing 694kg full (556-878kg) at assessment. Full individual EBVs are attached to this assessment - these cows all rank highly across all indexes with the mob average of 131 for Angus Breeding Index & 147 Heavy Grain Index index aswell as 2.59 for IMF. They are bred to produce progeny for the top-end feedlots, with the steers going to Rangers Valley every year, achieving high growth & marbling. Please note: one heifer with white on udder and one with small birthmark on the rump. The older 7 & 8 year old cows were mouthed and are still sound (one broken mouth removed). These cows would suit the most discerning Angus breeder and are a reflection of years of dedication in breeding Angus cattle.
