Assessor Comments	Offering 395 NSM Merino Ewes. These ewes averaged 45.8kg live at assessment and are majority score 1. They are May shorn with 35-50mm of wool and are mixed age. These ewes were purchased in from local properties two years ago as genuine breeders, mixed age SIL ewes. These ewes are currently grazing on fresh green pick from recent storms and would assume that they are starting to go forward and gain condition. There are many options with these ewes and would suit the restocker or trader due to the 40mm of wool on their backs and the majority of ewes still being ideal age to breed on. Please note there were 3 sighted with udder issues, 5 missing an ear and 2 with black marks on the ear but not on the wool. There were also quite a few ewes with scaly ears, mainly in the older ewes and some ewes are still showing some udder due to recently weaning a lamb.
