Assessor Comments	Outstanding line of 74 Australian White 2015 drop (blue tag) ewes scanned annually, classed breeders being sold as surplus to requirement by the Adlers who have been Tattykeel clients since the beginning of the breed. This line of 74 ewes had 143% of lambs weaned on the 27/10/21 and they are still in very good condition ready to be re-joined, very sound in the mouth and their confirmation is good. The photos attached to this assessment were taken 3 days after weaning which complements the sheep and hardiness along with their ability to keep weight on while they rearing 143% of lambs. By the time these ewes are delivered they will be able to go straight in with the rams and will be set to boost the operation of any breeder or someone wanting to start out in the breed. Please note these sheep have never been shorn as the Adlers have not shorn sheep on their property for 7 years.
