Assessor Comments	Quality offering of vendor bred 5 year old ewes which have had their lambs weaned off them for 6 weeks and ready to mate to the purchasers ram of choice. Ewes present in excellent condition being two weeks off the board and should be cycling well, vendor pregnancy scans annually and any dry ewes are removed and sold at that time to keep a high level of fertility in the breeding flock. Ewes have been mouthed and bagged for buyer confidence, with a small percentage removed prior to assessment. Blythe bloodlines have been utilised at Corringle for decades, resulting in long barrelled ewes predominantly plainer in the body, pushing out bright well nourished wool with an adult flock average of 19 micron. Note some ewes have longer toes in this group, relevant to their age. Will produce an excellent first cross lamb or mate back to the merino's for breeding purposes.
