Vendor Comments	Purchased heifers that have been PTIC to Angus bulls		
Joining Details	Station Mated bulls put in: 25/06/2021 bulls taken out: 08/10/2021 (106 days) Bull Breed(s): Angus To the vendors best knowledge, this lot has had no access to bulls or stags aside from stated joining period.		
Preg Tested?	Yes, this lot was pregnancy tested, by Glen Borrowdale (Vet, NCPD ID: 9709) on 12/11/2021. 43 Head (100%) PTIC, from 1 to 5 months (at time of assessment). Certificate Available.		
Other Joining Details	Bulls from XL Angus stud. Please note 2 preg testing dates as heifers were in 2 mobs. Both certificates up loaded		
Temperament	Yards	Crush	Paddock
	Quiet: 33 head	Quiet: 40 head	Temperament not assessed in
	Slightly Stirry: 10 head	Slightly Stirry: 3 head	Paddock
	The heifers were good to handle through the Crush, only one heifer jumped around a little bit on the scales. The heifers moved freely in the yards with out much pressure being applied. The cattle have been well handled but I think could stir up if to much pressure applied in the yards. The cattle in the paddock are rotationally grazed with the vendors saying they are very quiet in the paddock as they are moved regularly.		
Handled With	Bikes , Dogs		
Assessor Comments	A nice line of purchased heifers that are are joined to Angus Bulls. and were vet tested by Inverell Vet Clinic with certificates attached. The heifers were easy to handle and typical of breed needing a little more space and less pressure when handling in the yards. Heifers are 5 weeks to 20 weeks in calf and were preg tested in two lots as in different mobs. From preg test results they should calve from early April to mid July.
