The Curemont program focuses on breeding cattle with excellent temperament. K47 did unsettle a little on the platform, they were weighed in the race before the crush. Unfortunately due to the limitation of the yards her contemporaries were allowed to feed off after weighing, as K47 was the last one left she did become unsettled. In a group earlier she was fine, however it must be noted she did stir up when left on her own.

Assessor Comments	'Longreach K47' is a well bred Limousin Apricot PTIC cow. Bred in the Longreach Stud. She has been mated to Curemont Q24. A great opportunity for the buyer to take advantage of significant investment in leading Limousin genetics by the Curemont Stud. K47 was slightly stirred up in the weighing process as the rest of the mob was moving away in a larger holding yard, she was settled in the group pre weighing.
