	Steers are very well handled and have been drafted in a round yard and a race draft and been trucked once 400 km already. Few head slightly stirry in the race/crush and when pressured in yards but on the whole very good to work. Mustered with Horses/Bikes/Dogs/helicopter and been tailed out at weaning and mustering since.			
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs , Horses , On foot , Vehicles			
Assessor Comments	Predominantly a line of 6 decks of good quality softer Droughtmaster and cross steers. Are good framed steers in good store condition and clean in the coat and are on a rising plane of nutrition so would expect to gain quickly on better feed. Will be well suited to background or fatten on improved feed. Mouthed all the No.0's to get all milk tooth and 1 * 2 tooth. Steers were HGP treated with Compudose 400 day in March and Sept. of 2020 which would have now expired.. Are vendor bred bar 2 steers purchased as calves on their mothers branded H8H/TNV. Approx 15 steers exhibiting some young horn or regrowth at assessment. Steers were mustered and yarded 24 hours prior to assessing. Vendor also has 1 other lot in the same sale.
