Vendor Bred	No Vendor has owned stock for 6-12 months
Stock History	A % of the heifers in this mob are Vendor Bred, however the majority were calves on cows purchased February 2021. There are a % of heifers that have been cross-branded as they were branded as small calves by previous owner.
Lifetime Traceable	1 or 2 Orange NLIS tags noted at assessment.

Grazing Conditions	Light stand of predominantly Flinders grass (with some Mitchell grass and native herbage present), on undulating blacksoil downs and pebble ridge country. Returned same

	Heifers were good to handle through round yard at draft and through the crush at assessment. The odd heifer was a bit quick at draft but nothing that would square up, just looking for a gate. 5 heifers were noted to be uneasy in the crush, predominantly when being mouthed.					
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs , Horses					
Assessor Comments	2 decks of predominantly crossbred/flatback heifers ready to go on with to background for the feeder market. The lack of available feed has resulted in these heifers being offered to make room. A majority of these heifers were on/in cows purchased early 2021 (either cow/calf or PTIC units) with a smaller % being vendor bred. Well handled in the paddock predominantly with bikes and dogs but have also seen helicopters and horses. Heifers were weaned at "Herbertvale" early September then trucked to "Malakoff" so have had travel experience. 6 brindles and 1 baldy face higher content heifer were noted at assessment. 1 heifer was noted as having been tipped just above the head so horn butt is present. Heifers were walked out to an empty, easily accessible paddock with no other heifers adjoining them (separate paddock to the other mob being offered in this sale). Plenty of Frame for their weight and will surge ahead on good feed. Note 2 decks of lighter heifers being offered in this sale.
