Vendor Bred	No Vendor has owned stock for 6-12 months		
Stock History	A % of the heifers in this mob are Vendor Bred, however the majority were calves from PTIC cows purchased February 2021. There may be a very small % of heifers that have been cross-branded as they were branded as small calves by previous owner.		
Lifetime Traceable	1 or 2 Orange NLIS tags noted at assessment.		
Grazing Conditions	Light stand of predominantly Flinders grass (with some Mitchell grass and native herbage present), on undulating blacksoil downs and pebble ridge country. Returned same		
Burr/Seed in Coat	Odd Noogoora burr was noted in tail brush of the odd heifer. Due to ongoing management practices, there are no mature Prickly Acacia trees on "Malakoff".		
HGP Status	The owner declares that the cattle have not been treated with HGP at any period of their lives

Assessor Comments	2 decks of predominantly crossbred/flatback lightweight heifers ready to go on with to background for the feeder market. The lack of available feed has resulted in these heifers being offered to make room. A majority of these heifers were out of purchased PTIC cows (purchased earlier this year) with a smaller % being vendor bred. Well handled in the paddock predominantly with bikes and dogs but have also seen helicopters and horses. Heifers were weaned at "Herbertvale" early September then trucked to "Malakoff" so have had travel experience. 7 brindle heifers were noted at assessment. Heifers were bangtailed at assessment and were walked out to an empty, easily accessible paddock with no other heifers adjoining them (separate paddock to the other mob being offered in this sale). Plenty of Frame for their weight and will surge ahead on good feed. Note 2 decks of heavier heifers being offered in this sale.
