The steers were assessed having just been run in and drafted, and as such some were still a little unsettled and tail twitching up the race and on the weigh platform. As the video shows, the steers settled quickly on being back together.

Assessor Comments	This medium to large group of Angus steers present well in ideal condition to go ahead as good feeders or heavy grassfed bullocks. Their older brothers came through the yards after the assessment and I noted steers that were 620 to 730kg with 2 teeth. there is the odd steer with a single wart here and there.
