Assessor Comments	A line of vendor bred friesland steers that are extremely well grown, From a Healthy start having been reared alongside replacement Heifers, were dehorned and weaned onto hay and Grain mix @ 12weeks, currently grazing failed crop. The steers have been vaccinated with both shots of Bovilis, 5in1, and piliguard, and were drenched on the 15/09/21 with Baymec Gold. The steers are displaying plenty of bone and frame from a 700 herd of large frame friesland cows backed by over 40 years of AI breeding. So all the work has been done for you- just show them the feed and they will do the rest. These steers have been assessed as one lot and will be sold as a run out the gate in 2 lots of 53. Please Note 2 Calves were treated for Pink Eye at Assessment
