Assessor Comments	A line of 14 weaned Aussie red bulls calves. The Aussie Red calves are all purchased off 1 local dairy farmer that has been

	breeding Aussie Red cows by AI for 20 years. All the calves have been weaned into a paddock of rye grass with access to cereal hay and a calf grain mix. The calves have been dehorned, drenched with dectomax and injected with B12 and 5in1. This is a rare opportunity to purchase young cattle at very "low dollars" per a head. There was 1 calf with a watery eye that was treated for pink eye at assessment.
