Assessor Comments	An outstanding quality line of one mark Angus females PTIC to Speckle Park bulls. These heifers were scanned 60-100 days in calf on 19th November to present for a late May to end of June calving. They show depth, doability & softness, great growth through their weight for age & come from a top breeding program, being Roseleigh genetics. They have been joined to specially selected sires with a focus on calving ease. All sires are white bulls and will colour mark their progeny. Every care has been taken in all aspects with these heifers and they will not disappoint.
