Assessor Comments	A great opportunity to purchase quality line of Medium to large frame Angus heifers, presenting in forward store condition. Heifers carry Conamurra and Te Mania Angus bloodlines, PTIC to Rennylea Q167 to commence calving February onwards for 9 weeks. These outstanding heifers are very quiet and to work with, heifers are starting to soften down. Well structured heifers showing plenty of length and depth, heifers we're all drench, vaccinated and multiminid in the day of assessment. Please note 2 heifers had a splash of white on their udders. Highly recommend these heifers, and would be an attribute to anyones herd.
