Assessor Comments	Coopworth Composite & Charollais/ Coopworth Composite ewe lambs to be sold in two lots of 195. These are mostly later drop lambs, or out of ewe lambs (commenced lambing 2 weeks later than the adult sheep). Weighed prior to assessment into a very even line and weighed 23-34kg (ave. 29.7kg) full at assessment with a 10% tail removed. The vendors are very passionate prime lamb producers with a focus on breeding highly fertile flock, with high growth and heavy muscling lambs. Previous purchases have had very positive feedback on these as lambs, reporting high scanning and lambing percentages when joined at 7-8 months of age. Please note; vendor has two other lots in today's sale for a total of 1,150 lambs being offered.
