Health Declaration	A National Sheep Health Declaration will be provided at Delivery								
JD Approved Vaccinates	Sheep are not JD Approved Vaccinates.								
Vendor Comments	An obvious tail has been removed from this mob. Most ewe lambs have had their tails docked, small % of long tails just had elastrator rings put on. Approximately 10 to 15 of the bigger ewe lambs may have a very small Damara genetic influence in them.								
Joining Details	Station Mated - Continuously Joined Ram Breed(s): Dorper at 2.0% Rams								
Preg Scanned?	No, this lot was not pregnancy scanned.								
Other Joining Details	Dorper rams were depastured with ewes approximately ten weeks ago. Chance joining prior to that.

Assessor Comments	A very good to outstanding quality line of mostly Dorper and a small % white Dorper x ewes, 8 - 12 months, showing excellent growth and bloom. Weighed 43 to 71 kgs to avg 51.4 kgs four hours off feed. They are well grown and fat in condition, high score 3's and 4's. These ewes are as dropped and are only being sold to reduce overall flock numbers. Seven Dorper rams were put with the ewes approximately ten weeks ago. All signs were positive for a good joining with a strong season and mild climate conditions. A chance joining would have been possible prior to that. These ewes have NOT been scanned. An obvious tail has been removed from this mob. Typical shedding Dorpers - see videos. Note: As there are two lots of 200 in this sale, delivery will be a run out the gate! The vendors are flexible with delivery, if wet weather becomes a problem getting trucks in at your end.
