Health Declaration	A National Sheep Health Declaration will be provided at Delivery AT BUYER REQUEST		
JD Approved Vaccinates	Sheep are JD Approved Vaccinates. Vendor has been continuously vaccinating all retained lambs in the flock for 4 years		
Vendor Comments	Only selling to reduce the flock numbers due to high lambing percentages over years. Our flock averages 175% lambing including joining ewe lambs. These ewes represent about half of the 2 & 1/2 and 3 & 1/2 YO ewes. We have retained the rest.		
Joining Details	Not Station Mated		
Any Access To Rams or Stags?	To vendor's best knowledge, this lot has had no access to rams or stags.		
Assessor Comments	A line of young composite type ewes in the prime of there life. Coming from a very fertile flock averaging 175% lambing including joining ewe lambs. Only being sold due to the large lambing percentages and retaining younger ewes in the flock. These ewes represent about half of the 2 and 3 YO ewes from the Howe flock. With the other half being retained in the self replacing flock. There was a percentage of these ewes culled as ewe lambs. Please note that the orange tags ewes have been Gudair vacc, but do not have the V in there eartag as the vendor forgot to order V tags.
