	The heifers were ok to handle in the yard when in the mob with other cattle - However, it was noted that all 3 did become stirry/agitated/nervous when isolated while going through the crush & during weighing - Not considered 100% detrimental as these heifers have had limited yard handling & settled down ok when let back into the holding paddock							
Handled With	Bikes , Dogs , Vehicles							
Assessor Comments	3 Angus Yearling Heifers - Vendor Bred - Rising approximately 12-14 months - Grass Fed/No Antibiotics - Presenting in strong store condition with reasonable medium frame - These heifers have not been spoilt with feed through the Winter & there is plenty of potential for them go ahead given feed & drench - Suitable to tip out to background to take out to heavier weights to primarily target a grass fed fattening or select feeder program or possibility as future breeders - NOTE To the vendors best knowledge these heifers are NSM and have not had access to bulls on farm but not 100% guaranteed, this lot have not been pregnancy tested - Purchase with optimism if suitable for a select farm fattening program as these heifers should 'do up' nicely given the opportunity on good feed
