Assessor Comments	An excellent opportunity to purchase Vendor Bred Maternal Composite Ewes in the prime of their lives. These 110 Ewes are made up of 55 x Orange Tags (3yo) and 55 x White Tags (4yo). They still have at least 2 or 3 years of lamb production left in them. They are based on Chrome and Cloven Hills Bloodlines. This year they weaned 165 White Suffolk X Lambs at 151% on 23/9/2021. They are bare shorn and Gudair Vaccinated. Please note that about 20% of the Ewes have black spots on their face. A photo will also be attached of the lambs that were weaned off these ewes a few weeks ago. These Ewes represent a very economical way of entering the prime lamb industry or boosting numbers for an existing flock.
