Assessor Comments	An excellent neat B Double load of feeder steers in the highest of brackets when it comes to quality and type. Purchased via the CTLX Weaner sales though March and April earlier this year ex some of the breed leading herds of the district. These steers have been grazing fresh green rye grass crops over recent months and considering the extended bleak and wet conditions experienced through winter and spring across the Central Tablelands have really performed well. Presenting in ideal condition these steers are primed to enter the feed pens in a very tight weight bracket. To fit in with most yard requirements the steers were treated with their first Bovilis MH + IBR shot and are timed ready to receive their second by delivery and induction. Please note extended delivery given in assessment to suit your induction requirements. If this had to be modified happy to work in.
