Handled With	Very quiet cattle typical of hand reared calves. On foot
Assessor Comments	These mixed dairy breed steers are ideal for anyone looking for very quiet cattle to put away and grow out with the minimum of fuss. The calves were given Multimin, Bovilis MH+IBR and 7-in-1 on arrival and weaning, drenched with Dectomax at weaning and again after 6 weeks, and a Covine Moxy pour on at weaning. The odd steer is showing a little ringworm mark as is typical of cattle in close proximity to each other on the same feeders.
