Temperament

Yards	Crush	Paddock
Quiet: 10 head Slightly Stirry: 9 head	Slightly Stirry: 19 head	Temperament not assessed in Paddock

Cows behaved like typical older cows, they were assessed the morning after being preg tested, therefor were reluctant to work throughout the yards especially when in the force and race. They became agitated while being mouthed although did settle when released into a larger yard with the balance of the mob.

Assessor Comments	A quality line of Angus Cows, 5-9 Years old, Preg Tested 3-5 Months in calf to a Speriby North Angus Bull. At assessment the cows weighed from 506-802kg to average 646kg full, with a projected delivery weight of 614kg presenting in a forward store to prime condition. All of the cows were mouthed at assessment with 14 cows having sound mouths, 1 slightly worn and 4 broken mouths. During the assessment one cow cut her hoof, it has been treated and will be monitored up until delivery. 2 cows were noted to have white patches on their udders and 1 cow with an old blue eye - not considered detrimental. A great opportunity to purchase proven Angus Breeders. Please note the sister lot in the same sale, running on the same property although a different vendor (BD Chapman).
