No problems with the heifers apart from the fact that we were working in portable steel yards that were very noisy. Under the circumstances the cattle behaved very well .

Assessor Comments	Part of 120 PTIC Hfrs being offered at Mortlake by the Johns Family. This is the Second draft from a group of 57 Murdeduke Blood Heifers purchased at Ballarat in January. Both Lots would make a neat B-Dble load if required. Heifers are from various local, Western District Breeders including the Murdeduke Stud itself (note freeze brands) - all good quality and look a picture. Due to start calving early in the New Year to selected LBW Te Mania Bulls (see list in breeding details). Vendor has been specialising in PTIC Heifers for the last Seven Years and does everything possible to present a quality article, resulting in return Buyers.
