Vendor Comments	Last years drop were retained, grown out and finished in a on farm feedlot in which they performed strongly.		
Assessor Comments	A very even line of merino wether lambs, August 2021 drop, Bellalana Blood and recently weaned into feedlot pens being educated on grain, pro wean and lucerne hay. These are the top 470 wether lambs out of 800 in the mob. They are showing good growth for age, stretch and body length. They have had all animal health completed 3 weeks ago and will be run through an electro jetter with cooper fly and lice for purchaser confidence in wake of the fly season ahead. They have a good start in the wool which is bright. Approximately 5% of lambs have small redness in ears and face from photosynthesis after been running with ewes on country with St Johns wart, however this is expected to clear up fair quickly. 3 lambs to be marked before delivery. Ideal lambs to grow and fatten into trade or export markets.
