Vendor Comments	Annual sale of wether lambs.		
Assessor Comments	This is an excellent BD load of composite wether lambs; ready to shear and grow into heavy trade or export lambs. They are a middle run of a complete drop of July/Aug drop lambs with a tail removed. They are grazing on very good dryland Lucerne and still putting weight on. They are bred out of the Levantine composite ewe flock and sired by specially selected, top end Highlander rams ex Focus Genetics, with selection emphasis on growth, ema, worm resistance and constitution. All lambs are properly weaned and crutched.
