Comment on Fat Score 1 Sheep Strong forward store to fresh condition, the majority are good strong high 1's with a % very close to 2 score. The wether lambs are expected to improve significantly on the fresh green feed and now being bare shorn. 2 rainfall events since assessment on the top of a very good feed base.

Assessor Comments	Poperty sold - Merino Downs Flock dispersal. 7.5-9.5 months Terrick Poll Merino wether lambs From a classed Poll Merino specialist woolgrowing & self replacing flock. This is the total drop of 2021 wether wool growers, they are very even and well grown. 13 in the sample assessed of 87 have normal tipped wether horn. Assessed three days after shearing the lambs were healing very well from shearing cuts & abrasions. Given time and by delivery I would expect any shearing wounds to be well on the mend or have healed. The lambs are on very good quality feed and are expected to do very well from assessment to delivery - they will only go one way and that is improve on the fresh feed.
