Other Joining Details	Scanner commented most of the ewes were made pregnant during the last 2 weeks of the joining period
Assessor Comments	43 maiden merino ewes SIL to Charollais rams to commence 1st February for 5 weeks. Ewes are August shorn and weighed 44 kg average at assessment, of the 2 that were mouthed one was a lamb the other had 2 teeth. These ewes have been bred on soft rolling wool traits and show good frame for young sheep, the vendor shears every 6 months. With heavy rain during November these ewes look a bit washed out and some were showing the effects of the wet conditions through soft feet lameness, a weeks sunshine would be the ideal remedy. Buyers note there is a medium amount of Bathurst Burr seed in the wool.
