Assessor Comments	These young Merino Ewes are very well grown and in forward condition for their age. They have done well with the good season. Only been off shears for three weeks and are in great condition. These ewes are ready to put out to the rams of choice. They would be good for all breeding operations, i.e. crossbred, terminal sires or a self replacing merino flock which was what the vendor was using them for. The mothers were purchased out of SA, scanned in lambs to SA blood Merino Rams, that show all the strong features of the SA breeding flock. Their mothers are also in the sale today, as well as another mob of ewes on the property totalling 900, of which are only being sold due to a change of location for the vendors and the property being sold.
