Assessor Comments	Final Stage Composite Flock Dispersal. Offering on behalf of Account , AND Teusner. This line represents 68 , July/August 2016 drop ewes. These ewe are good medium - large frame for type and present in store to forward condition. The Teusner Family have been on Cashmore Park/Oaklea bloodlines for over 15 years and always buys in the top % of rams at the sale. Ewes are scanned annually and any dry ewes each year are removed. Ewes are January shorn and would benefit from have the wool removed and shown some fresh feed. Ewes have only had lambs taken off them over the last 1-2 weeks. Shear , feed and join to the ram of choice late summer into Autumn. Ewes will go around for another year, but some are missing wing teeth and are starting to get gaps between the teeth. The Teusner flock often scans at over 150%. Proven breeders in the prime of their lives. Property has been sold/leased and these ewes are priced to sell.
