Generally quiet in yards, odd heifer stirred up when in the crush. Generally not a problem.

Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Horses
Assessor Comments	A good line of Composite yearling heifers PTIC to Angus Bulls from 2-7 mts, weighed 261 - 465 kgs to average 366 kgs 18 hours off feed. Heifers are fresh and have grown out well on soft buffel country. These are mixed breeds (see videos) but are good quality and would make ideal replacement heifers for anyone looking to expand their herd. They were all easy to handle in the yards although a few typically stirred up in the crush when they were getting scanned. The heifers present fresh in the coat and are in good healthy condition going forward. Vendor is flexible with delivery as some roads may not be accessible. NB 1 heifer with a twisted tail, not detrimental to its breeding capacity. 24 heifers scanned undetectable also in this sale.
