Assessor Comments A good line of Brahman cross yearling heifers, scanned undetectable. Were running continuously with Angus Bulls until date of assessment. Weighed 242 - 357 kgs to average 297 kgs 18 hours off feed. Heifers are fresh in the coat, but are in store to backward store condition (see videos). Given the opportunity to graze on good pasture these heifers should bound ahead in conditon. They are approaching their ideal joining weight and would make ideal replacement heifers for anyone looking to expand their herd. They were all easy to handle in the yards although a few typically stirred up in the crush when they were getting scanned. Vendor is flexible with delivery as some roads may not be accessible. 60 pregnant heifers in this sale as well.
