| Assessor Comments | 16 PTIC Heifers acc. "Rosedale Nominees" - These heifers generally are retained in vendor's breeding program but only are on offer due to recent sale of property forcing herd reduction. Majority presenting in forward store condition. These heifers are sired by Fernhill bulls. Selection of bulls is a stringent process for the vendor where low birth weight, growth, structural confirmation & temperament are a key focus - please see sires attached indexes on assessment. This line of heifers presents the opportunity for the successful purchaser to take on a smart line of heifers. Please note at assessment two heifers were observed to have white udders of which one was forward to the navel. One heifer also had a grass seed removed from eye & will be assessed at delivery. ** Vendor offers another lot in todays sale** |
