Vendor Bred	No Vendor has owned stock for More than 12 months
Stock History	Majority purchased Western District calf sales, will be a sprinkling of vendor bred and Tasmanian bought cows.
Lifetime Traceable	100% of cattle in this lot are Lifetime Traceable
Bloodlines	Unknown
Grazing Conditions	Native unimproved country. Returned same
Burr/Seed in Coat	No Burr or Seed of weeds declared noxious observed in the coats at assessment
HGP Status	The owner declares that the cattle have not been treated with HGP at any period of their lives
Eligibilities	Russian Eligible Saudi Eligible
J-BAS Score	6
Vendor Comments	The inability to secure a property offering a long term agistment arrangement has meant cows will have to be dispersed. Disappointed to be selling quality breeding cows when the cattle market looks strong into the future.
Joining Details	Station Mated bulls put in: 26/05/2021 bulls taken out: 28/07/2021 (64 days) Bull Breed(s): Angus To the vendors best knowledge, this lot has had no access to bulls or stags aside from stated joining period.

Preg Tested?	Yes, this lot was pregnancy tested, by Colac Vet Clinic (Vet, NCPD ID: 267) on 04/10/2021. 21 Head (100%) PTIC, from 5 to 6 months (at time of assessment). Certificate Available.

Frame		Quality Grades		Store Condition

Quiet: 17 head	Quiet: 17 head	Quiet: 20 head
Slightly Stirry: 3 head	Slightly Stirry: 3 head	Slightly Stirry: 1 head
Stirry: 1 head	Stirry: 1 head	

At Eynesbury cows have run in paddocks 200-500 acres in size and in mobs of 80 to 120. Handled on a limited basis and yarded only when necessary (calf marking, preg testing, weaning) At assessment the remaining 50 calves were separated and sold, 140 sold 2 weeks prior. I have handled cattle through all of these stages and find them very well behaved under the circumstances. Cattle haven't seen a bale of hay for 2 years!!!

Handled With	Bikes , On foot , Vehicles
Assessor Comments	"Mainland breeding herd dispersal" A breeding program began 4 years ago with these Western District bought females and now there being offered as PTIC cows in the prime of there breeding life. I've overseen these cows for the last 2.5 years and handled them at every stage. The life cycle of a Eynesbury agistment cow, calve unassisted in Mar/April (yards can be 6-8km away), mark calves in late May drench cows and disperse bulls that arrive from Tasmania for joining till July, pregnancy test Sept, wean calves late Spring then do it all again. 2021 started with 202 PTIC cows, marked 195 calves, no cow losses, 191 back in calf, 193 calves sold @ $2112.04 average. Expect each lot to have 5-6 cows with white on udder and up to 2 with a cloudy eye. Preg certificate shows 324 tested in September (117 younger PTIC cows that had calves weaned early then sent to new agistment block in W/District) Calf prices attached in documents.
Assessor	**Dale Boyd (Level 1 Accredited)** Phone: 0477 143 361
Delivery Period	16/12/2021 to 16/12/2021 (1 day)
