Assessor Comments	This is a good line of Young Ewes that will grow out into good wool cutters and breeders. These Ewes have had a slow start due to all wet weather since weaning but will bounce away with dry conditions and all the good feed, they are Egelabra Blood which the vendors have been on for eight years. These Young Ewes have had a good start the wool being a low micron soft bright fleece, Four Ewes with Small Horns. This would be a good line of Young Ewes that are in there working gear that will do up quickly with the right weather conditions a must to consider. Small amount of spiny Burr in Ghouls
