	A (71+cm)	14%	Excellent	66%	Plain	98%
	B (66-70cm)	58%	Very Good	27%	Light	2%
	C (61-65cm)	26%	Good	7%		
	D (56-60cm)	2%				
Assessor Comments	There is 3 % of assessed lambs had horn which goes back changeover from horn rams , require crutching . Lambs were weaned when assessed so expect a small check although they will soon adjust . Weight for age the lambs are right up there for a July / August drop although with the family background there are no surprises . Refer to wool comments re weather damage , less damage than most other flocks due to "Merryanbone North " breeding base . Always sold in the winter however larger than expected lambing means sale has been brought forward . Normally shear March/April & lambs cut 4 kg's & generally around 18M wool. They are plain bodied ,good frame lambs that will perform .
