Assessor Comments	The annual draft of Beveridge agriculture's White Suffolk cross lambs. Weaned on the 1st of October onto a pure clover paddock these lambs have not taken a step backward and are still presenting in fresh condition for weaned lambs. The Beveridge ag breeding objectives are Growth, Positive fat & shape to achieve "the ideal" carcasses. At weaning these lambs received a 6in1 booster, Triple Combination drench, and had ClikZin applied to their breech. All lambs in this mob have been OJD vaccinated. Good young ewe lambs that will grow out quickly, and should produce shapely lambs given the opportunity.
