Any Access To Rams or Stags?	To vendor's best knowledge, the female portion of this lot has had no access to rams or stags.		
Assessor Comments	315 Dorset x Composite and Comp x Comp lambs, average 31.5kg full. The flock has been based on Cashmore Oaklea genetics for years and has introduced Cloven Hills genetics in the last few years. Approx 20% of the lambs are sired by a high indexing Poll Dorset and are mixed sex. The remaining 80% are Comp x Comp. The lambs are July / Aug drop. Weaned for 6 weeks, drenched and vaccinated at weaning. Lambs are grain trained on trail and lick feeders. The skins are a bit up and down with some longer skins and some short. A couple of the lambs have bare necks and bellies. Well bred lambs that I'd say were born as twins or triples, given time and feed they the genetic potential to grow out.
