| Comment on Fat Score 1 Cattle | Steers are fit to travel up to 1200 km from Julia Creek in one lift. A 12 hour spell is recommended at 800 km if travelling further then 1200 km in one lift. Steers are in store to forward store condition and strong. Best transport practices encouraged. Currently on a rising plane of nutrition. |  |  |

| Assessor Comments  | Quality backgrounder or bullock Fattening line of EU accredited, Vendor bred steers. Displaying good muscling, mostly strong bone & are thick, fleshy steers. Currently in store condition, displaying plenty of compensatory growth potential on productive pasture. Would expect majority of these steers to grade MSA. Colours include 65% red, 25% honey, 10% grey. 1 steer noted with water bag scrotum. All within a 55kg grouping. Bottom weight 210 kg and top weight 265 kg. Branded number 1. Whilst this is an impressive line of majority red & honey steers there is a small tail end in quality, with lighter bone displaying some minor confirmation faults however, still describe as fair quality for this small portion. Medium/ large frames with plenty of capacity to grow into heavy carcasse steers. Buyer pays dip for first attempt, vendor covers thereafter if required. Steers are good temperament. This is a quality line of steers to background on pasture! |                        |                          |     |                             |     |              |     |
