| Vendor Comments               | These weaners are off a line of purchased cows, we have not retained any of these heifers this is the entire line. We think these heifers would suit a breeding program. The only reason we are selling them is due to the small amount of rain received                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                        |                          |     |                             |      |

|                               | Stirry: 5 head                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                        | Stirry: 6 head           |     |                             |      |
|                               | The majority of the weaners in this lot are very good to handle. The cattle listed as slightly stirry are uneasy under pressure but calm down after pressure is released. The cattle listed as stirry are very agitated under pressure and take a little bit longer to settle after pressure is released.                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                        |                          |     |                             |      |

| Assessor Comments             | Buyers an opportunity to purchase a good line of weaned Red Brahman & Red Brahman cross heifers. The heifers in this line are from leading QLD Red Brahman genetics and carry the frame and style that would see them mature into a nice line of replacement breeders. These heifers would also grow into their frame and become a nice line of back grounder or feeder weight heifers. These heifers are only on the market due to the small start to the season in the area. The vendor would have retained these heifers if the seasonal conditions had improved. Buyers please note there are 5 heifers with worm scaring, 3 heifers with sore eyes from the dust, 5 heifers with small buffalo fly irritations, this is not concentrated detrimental. |                        |                          |     |                             |      |
