Assessor Comments	Buyers an opportunity to purchase a good line of weaned Red Brahman & Red Brahman cross HGP treated steers. These steers are in store condition but improving in condition after a small amount of rain produced some fresh feed. These steers have good frame and will bounce ahead on good feed growing into good backgrounder or feeder steers. These steers are out of a purchased line of cows that come with a solid reputation for performance. These steers are good to handle through the yards. The vendor would normally grow these steers out to feeder weights themselves but with only a small start to the season they are on the market. Please note there are 5 steers with small amount of buffalo fly irritations, this is not concentrated detrimental.
