Joining Details	Not Station Mated		
Other Joining Details	No exposure to bulls since purchase however unknown prior to this. There could be the odd heifer that is pregnant.		
Any Access To Bulls or Stags?	To vendor's best knowledge, this lot has had no access to bulls or stags.		
Temperament	Yards	Crush	Paddock
	Quiet: 40 head Slightly Stirry: 10 head Stirry: 4 head	Quiet: 36 head Slightly Stirry: 12 head Stirry: 6 head	Temperament not assessed in Paddock
	Heifers worked reasonable well through the yards. Plenty became agitated during weighing and mouthing, but settled once back in the mob. Be careful not to isolate any heifers as they can become fairly stirry if this occurs. Heifers require blocking and steadying through gateways and would advise new owner to spend some time settling them in on arrival. They do look to block up well in the paddock and seem to respect the use of dogs.		
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs , Horses		
Assessor Comments	Buyers, a line of good to fair quality heifers best described as Santa Composite (see photos and video for further clarification). These are all purchased heifers and presented in generally store to forward store condition. They look to be on the do and should gain weight quite quickly on improved pasture or crop. These actually weighted lighter than they looked so I would expect some good compensatory gains. Ideal heifers to take through to domestic feedlot entry weights or grow out to joining weights and mate to bulls. There could be the odd heifer in these that may be pregnant from prior to purchasing, definitely no bulls since purchase though. Noted the odd heifer with old ring worm scars and also some with old Buffalo fly rubbing scars on the neck, no issues here though. Also found a heifer with a pimple on here eye and if this develops into blight will be removed at delivery. Vendor has 270 heifers selling in five lots in this sale for buyers to build loads.
