	Very good steers to handle, they have been well broken in both the yards and paddock. Some slightly off when contained in the crush.

Assessor Comments	A neat double load of black EU feeder steers, right in the slot and full health treatments up to date including a double Bovillis MH + IBR vaccination. These steers have had a magnificent winter and have done extremely well. Usually sold to a repeat feedlot each year, here is the opportunity to secure feeders that will go on and perform. The genetic base in this cow herd is outstanding and these steers have performed well for everyone who has purchased them in the past. Please note the extended delivery period given to suit your induction schedule. If this needed to be varied happy to work around a delivery time. Please note the cattle are doing extremely well at the moment, ave nearly 2kgs a day so weights will be heavier than assessment.
