Assessor Comments

****BACKGROUNDERS/FUTURE BREEDERS LOOK ON**** The lead draft of the Penfold Cattle, heifers drafted on frame and weight. Averaging 241kg after an overnight curfew. Heifers show good length and frame with a lot of compensatory weight gain left in the cattle. Heifers have performed well through the spring and continuing to pack on the weight into summer. These heifers are perfect for a producer with excess feed looking for a short-term trade, with potential to join and breed from down the track. Heifers are already acclimatised and 'on the do'. Buyers are presented with an opportunity to put together a line of 257 one-mark cattle (offered in 4 lots). Note: Odd heifer with small amount of ring-worm of old tick scar & one heifer with a blue eye, not considered detrimental.
